

# TIMBER FRAME CAVITY BARRIER 551

**Timber Frame Cavity Barriers 551 are designed to prevent passage of fire through concealed voids within the external fabric of a timber frame building.**

- Polythene enclosed rockfibre barriers
- Manufactured to suit a specific void width
- Installed under compression
- Suitable for both vertical and horizontal use

## **Why not have the barriers branded with your company logo?**

- Product identification on site
- Increase exposure of your brand
- Colour match sleeves to your brand
