

Rockfibre Slab

Available
Now!

Any Thickness, Facing or Quantity ...
Any Time, Any Where

ACOUSTIC ROOF PROFILE

- Trapezoidal shaped sections of rockfibre
- Designed to fit within perforated profiles of metal roof systems
- Available in three finishes - plain, white or black tissue wrapped

FOIL FACED SLAB

- Non-combustible foil faced rockfibre slab
- Suitable where a vapour barrier is required

TISSUE FACED ROCKFIBRE ROLL

- Rockfibre roll on one side with white glass tissue (MP538) or black glass tissue (MP623)
- Designed for use in thermal & acoustic applications, where additional tear strength is required without the facing affecting acoustics

BESPOKE FABRICATION

- Small or large volume bespoke solutions
- All products cut and finished using the latest technology and management systems
- Support available to value engineer existing specifications
